

## Vise Top Bolts

The Vise Top Bolts are furnished with Vise Top Pin Insulators and may be purchased separately for replacement purposes. They are made of glass reinforced black nylon and designed to be tightened using the break-away ring. The ring is designed to break at an optimal torque to ensure proper gripping force on the conductor.

Two bolt models are available:

- B-1 bolt is designed for first generation Vise Top (VTB, VTM and VTP) insulators only
- B-2 bolt is designed for second generation Vise-Top Universal (VTU) models only
