

Secondary Cable Spreader

The S604GR is a secondary cable spreader which is used to separate triplex phase conductors and bare wire neutral at locations where customer service drops are to be connected. The S604GR is molded using a proprietary blend of gray high density polyethylene.

Benefits

- Compact size – lightweight, safe, and easy to use
- Trouble free – won't chip, crack, or break
- Long life – U V inhibitors prevent solar degradation
- Pole Mountable

Application

The S604GR Spreader is designed to accommodate up to three conductors and a neutral at service drop connections between poles. The S604GR is also suitable for fixed installations to the pole using a thru-bolt (not included).
