

# RT-33, RT-44 Ring Ties

## Description:

The RT-33 and RT-44 are ring ties used with Hendrix Spacer Cable Systems. The ring ties feature a unique, functional design and are molded using a proprietary EPDM rubber.

## Benefits:

- Flexibility assures ease of installation
- High strength provides tight clamping over the life of the circuit
- Firm retention of cables under short circuit conditions
- Proprietary EPDM rubber material is ultraviolet inhibited and stable for long life, proven by 30+ years of field experience

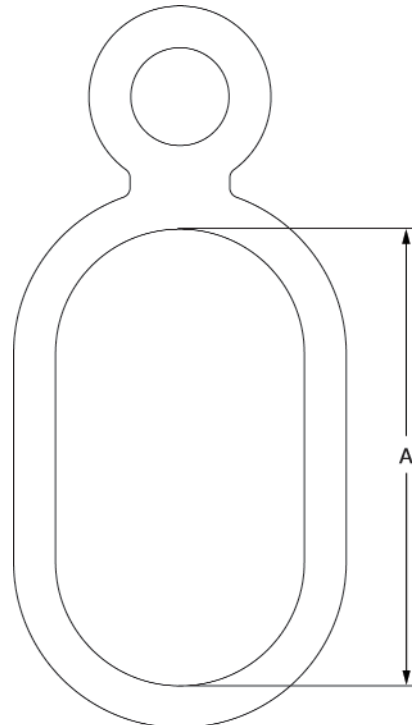

## Application:

RT-33 and RT-44 ring ties are used to secure the Hendrix H-series of spacers to the messenger and cables. The RT-33 will accommodate the entire range of messenger and conductor sizes. The RT-44 is available for customers who require replacement ring ties for Hendrix older design spacers. After the messenger and cables are pulled in and sagged, the spacers and ring ties are installed. To facilitate installation of ring ties, an optional ring tie installation tool is furnished with shipments of spacers with ring ties.
