

Stripping Tools

Description:

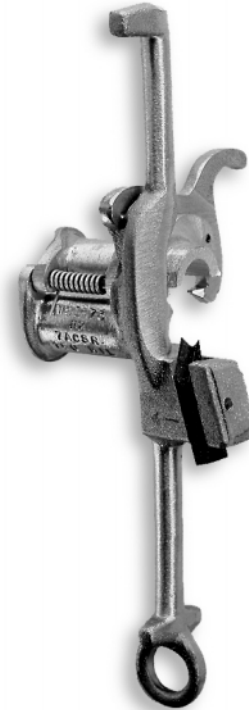

The Ripley Company offers three models of stripping tools that facilitate the removal of the covering on Hendrix Spacer Cable and Tree Wire. The WS-1, WS-2 and WS-10 provide a cost effective, reliable means of completing both end and mid-span strips. These tools are manufactured specifically for a given cable construction.

Application:

In ordering a WS series tool from Ripley, the following information must be provided to insure that the tool is sized properly:

- A.) Conductor size and diameter
 B.) Insulation thickness
 C.) Outside diameter of cable $+ .020/- .010^*$
- } This information is located in Section A2 of this catalog.

* This is the standard manufacturing tolerance for the outside diameter of Hendrix Spacer Cable And Tree Wire.

Ripley Model No.	Cable Diameter (inches)
WS1	0.320 to 0.790
WS 2, WSK 2*	0.750 to 1.300
WS 10, WSK 10*	1.300 to 2.00

* WSK models are designed for cables with a covering thickness greater than 0.200"
